DOOR CONTROLS AND GLASS

Surf Club
OCEAN GRILLE

*From company awards to great entryways.
No job is too small, no project is too big.*

Virtually any glass or stone object can serve as the canvas.

Windows, mirrors, shower and bath enclosures, office building glass walls, entry doors, cabinet doors, side lights, booth and room dividers, partitions, table tops, desktop ornaments, name plates, personalized mugs, glass picture frames, and more!

In many commercial environments, the need for name recognition is vitally important. By having your corporate logo/identity sandblasted onto the front entry doors or on a glass curtain wall in a conference room, you are establishing your name with your clients and showing a sense of pride in your company.

Creativity and unique designs are our main strengths.

Our capabilities include:

- Professional and dependable service
- We handle all phases of your project, from concept through installation.
- We can consult with customer's architect's and designer's.

Glass etching is a beautiful and elegant method of creating a graphic design on the surface of an otherwise smooth piece of glass. It is permanent and will never come off. Glass etching on an entrance to a home or office creates a dramatic first impression like no other architectural material can. Etched glass entries and etched glass doors are elegant and quite sophisticated, modern yet can be very classic. Even the best etched glass design is only as good as the technique used and its execution.
